Forecast For Northwest England
Issued by Met Office Exeter
at 1600 on Thursday 13 May 2021

++ Valid for broadcast between 1800 and 0600

Headline:
Mostly dry and cloudy for tonight and on Friday.

This Evening and Tonight:
Daytime showers ease for most into the evening, leaving a dry night. Mostly cloudy over the southern areas, though patchy grass frost is possible to form in the north under the clear skies. Minimum temperature 5 deg C (41 deg F).

Friday:
A largely dry and cloudy day across the region with some sunny spells over the western areas. Some isolated showers remain possible throughout. Lights winds developing during the night. Maximum temperature 15 deg C (59 deg F).

Outlook for Saturday to Monday:
Remaining unsettled throughout the period, with sunny spells and showers. These showers are likely to persist overnight in places, with the widespread daytime showers heavy and thundery at times.
